

Proposal  
for  
**LIMITS**  
2020

Barath Raghavan (USC)  
Oliver Bates (Lancaster)

**Vision: towards sustainable academia**

**Venue: two locations**

**Structure: modeled on SHB workshop**

**VISION**

The global conference model is unsustainable

Virtual conferences are a must for the future

Fully virtual conferences fail to develop community

New models are needed

LIMITS should lead the way

**VENUE**

Hold LIMITS 2020 in two locations *at the same time*:  
~~Lancaster~~ Bristol (UK) and University of Southern  
California (USA)

Main sessions will be video conferenced:  
8am-11am (Pacific Daylight Time)  
4pm-7pm (British Summer Time)

Each site will hold local events outside of main sessions

Attendees can join at either location

**STRUCTURE**

The value of LIMITS is in the community

Avoid the dilemma of the ICTD community  
(competing for technical papers with established venues)

Modeled on Workshop of Security and Human Behavior:  
Invited papers (shepherded) and presentations  
Numerous local events
